

ING. ALESSANDRO HIDALGO

FULL STACK WEB DEVELOPER

 alessandro.dev04@gmail.com  [Portfolio](#)  [aledaniel04](#)  [Alessandro Hidalgo](#)

Professional Profile

As a Systems Engineer, I have focused my career on agile methodologies, project management and efficient web application development, always seeking to balance technical solutions with collaborative work. Currently, I am looking for a team where I can contribute not only my technical experience, but also my adaptability and curiosity to learn. If you value someone who understands challenges from multiple perspectives, is passionate about integrating into projects and believes in continuous improvement... here I am!

Technical Knowledge

- HTML • Prestashop • CSS • JavaScript • JQuery • Tailwind css • Next.js • MySQL • Supabase
- React • Vite • PHP • typescript • Node.js • Bootstrap • Plesk • Vercel • Firebase

Work Experience

Freelancer Developer

Web Developer | November 2023 - Present

- Development of web applications with different technologies such as HTML, CSS, JavaScript, React, among others.
- Experience in managing projects independently, covering everything from planning to implementation.
- Adaptation of custom solutions to meet client needs.
- Sample projects and contributions on GitHub.

Fullstack Web Development Teacher

Syntatic Academy| January 2024 - Present

- I teach a comprehensive course for the training of new fullstack web developers, with special emphasis on the use of React.
- I develop and update teaching materials based on the latest trends and best practices in the sector.
- I promote a collaborative and practical learning environment, oriented towards the completion of real projects.
- I carry out continuous evaluations and personalized advice to ensure the advancement and consolidation of technical skills.
